Interactive Interface

• A web-based visualization of the metrics that have been developed
• The target audiences are subject matter experts and program staff
• Designed to help the audience ascertain the value and accuracy of the newly designed metrics

Interactive Interface

• Work completed to date
  – Basic interface set up
  – Data from all teams integrated into a database optimized for performance
  – First design prototypes set up for user studies
Interactive Interface

- Prototype expected complete: End of September 2016
- User studies planned for late September-early October
- Plans for future enhancements
  - Time-based filtering
  - Metric customizability
