Brief Bio and (PR)²: Problems & Pitches – Raves & Rants by Todd Holloway

In preparation for the Mapping Science Workshop on April 4th, 2006 at The Study, New York Academy of Sciences, New York, we ask you to provide a brief bio and your input to the questions below. Feel free to concentrate on the questions for ‘Map Makers’, for ‘Funding Agencies / Clients’, or answer both sets.

We plan to make your input available at http://vw.indiana.edu/places&spaces/meeting_060404.php before the meeting to ease introduction of participants and will use it to more effectively structure the workshop.

Thank you for your time.

Biography (about 250 words)
Todd Holloway is a 4th year PhD student in computer science at Indiana University. His primary research interest is in computer supported reuse of information visualization knowledge. Additional research interests include information retrieval, case-based reasoning, and unmanned vehicles. He has recently completed internships at Amazon.com and Boeing. Todd holds an MS in computer science from Indiana and a BA from Grinnell College.

General Questions
What is your main interest in attending the workshop?
To further understand best practices in information visualization.

What is your main interest in ‘mapping science’ and/or ‘knowledge management (KM) tools’?
My interest in KM tools comes in wanting to understand the state of the art in maintaining knowledge, and to extend the role of the computer in storing, adapting, and recommending knowledge, particularly information visualization workflow knowledge.

Please send the completed document by Thursday March 30th, 2006 to Katy Borner <katy@indiana.edu> and Deborah MacPherson <debmacp@gmail.com>
