Brief Introduction

Howard Ratner
Co-Chair ORCID
CTO, Executive VP NPG
h.ratner@us.nature.com

Mission

ORCID aims to solve the author/contributor name ambiguity problem in scholarly communications by creating a central registry of unique identifiers for individual researchers and an open and transparent linking mechanism between ORCID and other current author ID schemes. These identifiers and the relationships among them can be linked to the researcher’s output to enhance the scientific discovery process and to improve the efficiency of research funding and collaboration within the research community.

Timeline

Not-for-profit organization: Q2 2010
Prototype: June 2010
Production: TBD 2010
ORCID is extending a clone of the Researcher ID system developed by TR.

- ORCID Number
- Name (first, last, middle)
- Other names
- Email address
- Persistent URL
- Role
- Subjects
- Keywords
- Description
- User defined URLs
- Privacy settings
- Institution name
- Sub organization
- Sub organization Address
- Sub organization role
- Joint affiliation name
- Joint affiliation sub organization
- Joint affiliation start date
- Joint affiliation role
- Past affiliation information (name, city, country, start date, end date, role)
- Personalization settings
- Opt in/out

* Initial list to be extended *
An author can either create a new ORCID ID or import profile information from an existing profile system (e.g., Scholar Universe, Researcher ID, Scopus, REPEC). Once an author has an ORCID ID they can export this profile information from ORCID to relevant stakeholder systems.

Stakeholders are researchers (who can use ORCIDs to more efficiently and accurately record and present their research-related profiles), institutions (where ORCIDs might be used in researcher evaluation), publishers (where ORCIDs are input into manuscript tracking systems), and funding agencies (where ORCIDs might be used for evaluation or tracking of research).

Privacy and access rights as well as funding issues are being tackled. Some information will be optional and researchers will have control over their private data in the registry.

ORCID may be linked to other registries, such as the International Standard Name Identifier (ISNI) a draft international standard for tracking creators, actors, artists and performers.
Institutional Data Handling

ORCID Profile Merge Wizard

The following information has been provided by the Brown University Library. Please click on the checkbox next to the item you would like to add to your existing profile.

- Department: Department of Psychoacoustics and High-Energy Metaphysics
  - Confirmed
- Website: http://www.brown.edu/psychoaustics/"jazzberry/index.html
  - Confirmed
- Shown?

ORCID Profile Merge Wizard

The following information that has been provided by the Brown University Library conflicts with information that exists in your current profile. Please select the correct information and then click on the "Next" button to proceed.

- Brown University Library:
  - Email: jason.jazzberry@brown.edu

ORCID Profile Setup Wizard

If you already have a profile registered with one of the many ORCID Profile Partners, then you can save yourself time by importing your existing profile into the ORCID system. Select the partner with whom you have an existing profile below.

- I do not have an existing profile
- SCOPUS
- RePEc
- OCLC
- without Resolver

THE INITIATIVE

Name ambiguity and attribution are persistent, critical problems embedded in the scholarly research ecosystem. The ORCID initiative represents a community effort to establish an open, independent registry that is adopted and embraced as the industry’s de facto standard. Our mission is to resolve the systems name ambiguity by means of persistent unique identifiers, enable to an individual’s research output, enhance the scholarly discovery process and improve the efficiency of finding and collaboration.

News

67 Dec, 2015
"Collaborative Credit is Ours." New article helps introduce ORCID.

0 Dec, 2010
Announcement of intent to collaborate across the author name unification.
