Gephi, an open source software to visualize and create maps of networks

Sébastien Heymann <seb@gephi.org>
VIVO workshop, March 2011
Gephi in a Nutshell

« Like Photoshop™ for graphs. »

Helps data analysts to reveal patterns and trends, highlight outliers and tells story with their data.

- Network visualization platform
- Open source, supported by a community
- Built for performance and usability
- Extensible by plug-ins
- Windows, MacOS X, Linux
A tool to map networks

The Gephi Consortium

A not-for-profit corporation under the French law of July 1st, 1901 – equivalent of US 501(c)(3).

- We organize and support the community
- We provide leadership in developments (roadmaps, mentoring, support)

Purpose:
R&D effort to build generic and reusable parts of Gephi
What we can bring to VIVO

- A technology for network cartography, stand-alone or embedded in a service like:

- An expertise in network visualization
- Software development
