Cassidy R. Sugimoto is an Assistant Professor in the School of Library and Information Science at Indiana University Bloomington. She received her doctoral degree in Information and Library Science from the University of North Carolina at Chapel Hill. Dr. Sugimoto’s research focuses on how scholars conceptualize and operationalize the birth, maturation, and interaction of disciplines. Her teaching areas include research methods and scholarly communication. She is heavily involved in service, particularly for the American Society for Information Science & Technology (ASIS&T). She is the winner of numerous awards for research and service, including the Thomson Reuters Citation Analysis Research Grant, the ALISE/Eugene Garfield Doctoral Dissertation Award, and the James M. Cretsos Leadership Award.

General Questions

1) What is (are) your main interest(s) in attending the workshop?
I am interested in understanding the theoretical underpinnings, assumptions, and frameworks scholars are using when they create new standards.
2) Please list standards that are missing in your work.
I think there is a need for explicit conceptualizations to accompany all the existing standards and metrics.

3) Please list standards that are most useful in your work.
I appreciate work in which the scholars include both a conceptualization and an operationalization. However, this is the exception, not the rule.

4) What would you like to learn / achieve at the workshop?
I would like to learn more about how people approach the development of new metrics, classifications, and maps and how these are theoretically grounded.
