Characteristics of successful data visualization in museums?
People engage with experiences where they can see themselves in a new way.
Personal metrics

Personalization: Body
Personalization: Geography (zip code)
Here is how other Science Buzz visitors are answering these questions. Your responses are included.

Marie is 82 years old, and in the final stages of a terminal disease. She relies on a respirator to help her breathe, and feeding tubes for food and water. She is in constant pain. The doctors expect she has only a few months to live. Marie feels she is ready to die, and has asked her doctor if he can give her an injection that will allow her to pass away peacefully and painlessly.

**Personalization: Opinion (attitude)**

- Should doctors help terminally ill patients commit suicide?
  - No: 25%
  - Yes: 34%
  - Don't know: 41%

- What if Marie's hospital care was very expensive, and she was being pressured by her family or her insurance to end treatment. Should the doctors comply with her wishes?
  - No: 14%
  - Yes: 3%
  - Don't know: 83%

**Personalization: Experience metrics**
